BATTEY SEPARATORS

GLASS MATS

“ONLY MANUFACTURER IN INDIA”

ABOUT CREVEIL:

The products CreVeil®-401 consists of specially selected glass fibre which suitable for lead-acid batteries. The glass fibre mat is bound by a modified Acrylic resin which is acid resistant. Primarily designed as a retainer mat combined with a variety of micro porous separators, for use in lead acid batteries.

Available in 0.3mm 0.4mm, 0.60mm, 0.9mm and 1.2mm thickness as per costumers.

ADVANTAGES:

- ✓ Glass Fibre for Superior Quality
- ✓ Good flexible material for easy handling
- ✓ Exceptional Resistance to Acid at High Concentration
- ✓ High Chemical Purity
- ✓ High Temperature and Oxidation Resistance
- ✓ Suitable with leaf and envelope separator like PE, PVC and glass paper

Our technical team is actively involved in new product developments. We develop client's specific products using wet-laid process. Please contact us for further information about our products and development.
